Dhaka, Bangladesh

Summary

Highly motivated Computer Science and Engineering student with strong foundations in data structures, programming, and computer networking. Possesses solid research aptitude, analytical thinking, and collaborative skills to contribute effectively to technical and interdisciplinary projects.

Experience

Organizing Secretary
NITER Science Society
01/2025, Dhaka, Bangladesh

- Organized inter-university Quiz Contests, Seminars, and Workshops
- Prepared Questions, Checked Solutions

Deputy Treasurer
NITER Computer Club
01/2025 - 03/2026 Dhaka, Bangladesh

- Managed financial records, budgets, and sponsorship.
- Collaborated with executive members on fund allocation.

Senior Executive
NITER Computer Club
01/2024 – 12/2025, Dhaka, Bangladesh

- Organized inter-university programming contests and seminars.
- Coordinated communication among club members.

Education

BSc. in Computer Science and Engineering
University of Dhaka (Program at NITER)
10/2022 – Present Dhaka

Higher Secondary Certificate (Science)
BAF Shaheen College Kurmitola
07/2019 – 12/2021 Dhaka

Certifications

IBM Data Science Professional Certificate
IBM via Coursera, Feb 21, 2026
Verification: Credly Badge

Introduction to Deep Learning & Neural Networks with Keras
IBM via Coursera, Dec, 2025
Verification: 6OM6NKQW6V23

Certificate: Getting Started with Git and GitHub
IBM — Jan 20, 2026
Completed graded hands-on assignments and final assessment
Verification: BQV5MS40POF4

Skills

Languages & Core

C/C++ Java Python JavaScript PHP HTML CSS LaTeX MySQL

Data Science

Pandas NumPy Matplotlib Seaborn Plotly Folium Scikit-Learn Power BI

Networking & Other Tools

Cisco Packet Tracer GitHub Cybersecurity

Projects

Central Medical Records & Disease Tracking
01/2025 – Present · *Database Management*

- Developed a medical records system for patient registration, diagnosis, prescriptions, vaccination, and hospital management.
- Implemented relational database design with automated MED_ID generation.

Alphabet Inc. Network Simulation
10/2025 – 11/2025 · *Computer Networking*

- Developed a hierarchical hybrid-star network topology connecting Alphabet's subsidiaries.
- Configured EIGRP, OSPF, RIP, and VTP for routing, redundancy, and fault tolerance.

Falcon 9 Launch Success Prediction
01/2026 · *Data Science & Machine Learning*

- Analyzed real-world SpaceX launch data and built classification models to predict first-stage landing success.

Aircraft Damage Classification & Image Captioning
2026 · *Deep Learning*

- Classified aircraft damage as dents or cracks using VGG16 transfer learning.
- Generated image captions using a pre-trained BLIP-based model.

Achievements

- **4th Place (Senior Level)**
  — National AI Competition, BUBT
- **5th Position (Open for all)**
  — Intra-University Hackathon, NITER
